## PRESS RELEASE

# W420 ONE MAN AIS SART Approved in professional Spanish market

The Spanish Ministry of Infrastructure has approved with number 63.0002 the W420 OneMan AIS SART.

"For us it is an important step, which confirms the high degree of professionalism achieved in a few years after the company startup" said Daniele Banfi, CEO of Wamblee Ltd.

The W420 AIS can signal the position of a person in trouble through the AIS SART system and a special identification code that differentiates it from any other AIS SART device. Easily applicable on a life-jacket, this device can be activated manually or automatically (when armed) in the event of falling overboard.

Thanks to its flexible antenna and the fixing strip, the W420 MOB can be easily fastened on many inflatable life-jackets so that the person in trouble has not to manage it.

Its flexible antenna is specially designed to fit critical operating conditions (proximity to water and to the body of the shipwrecked person), offering the highest possible efficiency.

The ergonomic design makes it easy to positioning the device within the enclosure of the inflatable vest.

The W420 AIS, once activated, will be visible on most AIS receiving devices through the unique identification code (ID) and the message 'SART ACTIVE'.
