

Service Bulletin :	SB-2
Issue date :	May 7, 2021
Language :	EN
Product affected:	All W4xx
S/N or other info	-
Change/Issue	Change in lower W4xx plastic box and gasket
Severity	Level 3 (1 – aesthetic , 2 – random problem , 3 – requires action)

Description

Following an internal evaluation, we proceeded to carry out a modification in the lower body of W4xx (Yellow part).

The modification involved a change of the gasket model that must be used in case of replacement.

To recognize which W4xx bottom model it is, it is necessary to visually analyze inside the case, in the upper corner near the positive contact of the batteries. The presence of a protruding point in the plastic indicates that the W4xx container is of the second series (new), the absence of the point indicates that it is a container of the first series.

Picture 1: Old

Picture 2: New

The gasket codes are as follows:

Old series: P/N C20400
 New series: P/N E00142
